Summary

An experienced iOS developer, willing to take responsibility for core components of any project. I have helped maintain and improve a product used by thousands of daily users. As an active team player with great communication and problem solving skills, I am always willing to help others or seek help when needed. Looking to work on new and engaging projects, with challenging constraints and novel environments. As well as to grow my software development skills further.

Skills

- Swift, Objective-C, UIKit, SwiftUI, Storyboards
- Combine, Swift Concurrency, Cocoapods, SwiftPM
- Javascript, Node.js, Express.js, MongoDB, Redis, REST
- MVC, MVVM, Bash, Git
- Java, Kotlin, C, AWS
- Collaboration, Mentorship, Teamwork, Organization

Professional Experience

Bendigi Inc. — iOS and Backend Developer   September 2018 - Present

- Responsible for the maintenance and improvement of the Canadian Mortgage App.
- Implemented a number of advanced UI components, including parallax scrolling, flexible scrolling headers, complex paginated workflows and more.
- Pioneered the transition to Swift, designing guidelines for code-style and Swift/Objective-C interoperability.
- Developed an internal utility app to help with customer support and QA, utilizing latest Apple technologies such as SwiftUI, Combine and Swift Concurrency.
- Implemented a backend for the management of users and their resources.
- Collaborated and worked in tandem with the Android and backend teams to ensure the best possible result.
- Provided mentorship to other developers in areas and topic that they found challenging.

DRDC — Software Development Intern   May 2018 - August 2018

- Tasked with providing a prototype of a native alternative to an existing hybrid app.
- Consulted the local research staff on updates from a team of offsite contractors.
- Fixed critical issues and resolved a number of bugs.

DRDC — Software Development Intern   March 2017 - August 2017

- Provided aid in processing of large sets of research data.
- Acted as a consultant between offsite contractors and the local research staff.
- Participated in the development of smaller features of the primary product.

Education History

York University   September 2017 - May 2020

Bachelor of Science in Computer Science
