Experience

Score Media & Gaming — Senior iOS Engineer — May 2024 - Present

- Contributed to a large codebase, following the best coding practices and ensuring all code is clean, testable and tested, all while working in a large and distributed team.
- Volunteered in efforts in cleaning up the codebase and modernizing it for future proofing.
- Lead a number of projects providing engineering and architectural insights. Coordinated different parts of the project between various teams to ensure a successful and timely delivery across all three client platforms.
- Helped develop a number of complex UI components, critical for feature delivery.

ThoughtWorks Canada — Senior iOS Consultant — February 2023 - May 2024

- Aided a client specializing in social networking and virtual experiences by making various improvements and optimizations to their codebase.
- Led the development of an internal SwiftUI based Mac app that focused on improving workflows when developing strategies with potential clients.
- Worked on a number of projects with various different companies.

Bendigi Inc. — iOS and Backend Developer — September 2018 - January 2023

- Responsible for the maintenance and improvement of the Canadian Mortgage App.
- Implemented a number of advanced UI components, including parallax scrolling, flexible scrolling headers, complex paginated workflows and more.
- Pioneered the transition to Swift, designing guidelines for code-style and Swift/Objective-C interoperability.
- Developed an internal utility app to help with customer support and QA, utilizing latest Apple technologies such as SwiftUI, Combine and Swift Concurrency.
- Implemented a backend for the management of users and their resources.

Education

York University — September 2017 - May 2020

Bachelor of Science in Computer Science

Projects

Fytlist - An exercise tracking app (available on GitHub)
- Written as a completely offline SwiftUI app with no third-party dependencies.
- All source code is separated into modules using modern SwiftPM practices.

Solfeo - Practice your musical ear (available on the App Store)
- Built with latest SwiftUI and Combine practices, utilizing AVFoundation for audio playback.

Skills

- Swift, Objective-C, UIKit, SwiftUI, Storyboards & Interface Builder
- Combine, Swift Concurrency, SwiftPM, Cocoapods
- Javascript, Node.js, Express.js, MongoDB, Redis, REST, ReactNative
- MVC, MVVM, Bash, Git, Mercurial
- Collaboration, Mentorship, Teamwork, Organization
